

Company Profile

about us /

Founded over 25 years ago by Managing Director, Ciaran McEvoy, the Safety Solutions Group has firmly established itself as one of Ireland's leading compliance organisations. We maintain particular expertise in Safety and Health compliance across all sectors including Construction, Manufacturing, Public Service, Renewable Energy, Education, Pharma and Hospitality.

The services we provide include specialist advice and support to our clients, safety training and testing and statutory inspections of plant and equipment. Many of the services we provide are statutory requirements for employers; our solutions-based approach ensures compliance and peace of mind for our clients.

Consultancy

The Safety Solutions Group Consultancy Team has led the way through the evolution of Safety and Health compliance in Ireland across all sectors. Our advice and guidance has helped our clients sustainably grow their businesses by helping them navigate the various compliance hurdles, such as pre-qualification and tendering requirements.

We have also helped our clients grow their own internal health and safety competencies by positive and meaningful engagement at all levels within their organisations.

Within our Consultancy Services, we offer diversified roles and services to our broad client base to coincide with continually evolving legislation and best practice.

These services are outlined in the following sections.

Construction Health and Safety Management

The Safety Solutions Group offers a wide range of construction-based health and safety management services, from Project Supervisor Construction Stage to Site Safety Officer placement to Project Supervisor for the Design Process.

We also offer Site Safety Auditing through our customised, app-based, safety management system. The flexible functionality of the app-based system ensures that our clients receive the specific information they require, thereby helping them track their progress whilst attending to aspects requiring their attention.

The Safety Solutions Group also provides contractors with tailored specific retainer packages providing peace of mind and confidence that their and safety and health requirements and obligations are being fulfilled on-site.

Project Supervisor Design Process (PSDP)

As defined under the Safety, Health and Welfare at Work (Construction) Regulations, applicable construction work must be overseen by a competent person or organisation so that it is appropriately designed, is capable of being constructed safely and without health risks, can be maintained safely, and complies with the relevant statutory provisions.

Working with designers, architects, project managers, property developers and others, Safety Solutions has acted in this role for hundreds of construction projects across the country and has developed highly effective and streamlined management systems to manage the process.

Through our expertise, we can ensure that:

- ▶ Designers comply with their duties—particularly with respect to the avoidance and reduction of risk while adhering to the General Principles of Prevention.
- ▶ Clients are fulfilling their legal duty by successfully determining the competence of Designers and the PSCS while sufficiently allocating resources.
- ▶ The Preliminary Health and Safety Plan is prepared promptly so that it can be used by the PSCS in preparation for their Construction Stage Health & Safety Plan.
- ▶ The project is notified to the HSA.
- ▶ The Safety File is prepared and promptly delivered to the Client at the end of the project.

For more information on our PSDP services please contact **Edel McGoey** at edel@safetysolutions.ie / 086 7778135

Statutory Documentation

The Safety Solutions Group can also assist Clients in providing all the Health and Safety Documentation required for their business sector, this includes documents such as Safety Statements, Method Statements, Risk Assessments, Building Audits, Traffic Management Plans, Competency Assessments, Legislative Compliance Audits and Accident and Incident Investigation and Reporting.

We also have vast of implementing Safety Management Systems including Safe T Cert and can also deliver a Gap Analysis Auditing service.

Competent Person

Under Section 18 of the Health, Safety, and Welfare at Work Act 2005, all employers are obliged to appoint one or more competent persons to perform such functions as specified by the employer, relating to the protection from and the prevention of risks to safety, health and welfare at work. The Safety Solutions Group can fulfil this competent person's role either fully or partly in coordination with internal organisational competence.

Being able to source this competency service externally to their workforce provides the client with the confidence and reassurance that they are acting in accordance with the legislation while still maintaining the output potential of their existing internal employees.

Experts in Accident Prevention, Risk Management and Safety Training across all sectors nationwide

Homeworker Assessment

Working from home or remotely either part-time or full time has become the norm for many people in Ireland over recent years. The home or remote location has, therefore, become a place of work; with that comes certain duties and responsibilities for the employer and employee. One of the duties of the employer, in this case, would be to carry out a risk assessment, including an assessment of the employee workstation.

Remote Worker Risk Assessment is a service from Safety Solutions Group that helps employers ensure the safety and comfort of staff whilst working from home or other remote locations. The service is hassle-free and provides compliance.

We help employers understand their compliance obligations and develop a suitable package that fits their budgetary and timeline constraints.

Our expert team conducts the 1:1 online assessment with remote staff, providing tips, advice, and guidance on how they can improve their workstation setup and wellness. This is followed up with detailed and summarised reports to the employer for individual employees and the overall team.

Fire Safety Consultancy

Safety Solutions Group offers a full range of fire safety consultancy services, including the following:

- ▶ Fire Register
- ▶ Fire Risk Assessment to PAS 79
- ▶ Assisted Fire Drills
- ▶ Floor Layout Plans
- ▶ Fire Training for all roles including Fire Wardens and Marshals

Event Safety

Safety Solutions Group can provide Event Controller and Event Safety Officer services in accordance with the Planning and Development Act 2000 and the Planning and Development (Licensing of Outdoor Events) Regulations 2001. The services we can provide include the following:

- ▶ Event License Applications
- ▶ Event Plans
- ▶ Provision of Event Controller
- ▶ Provision of Event Safety Officer
- ▶ Emergency Management including tabletop Major Emergency Management (MEM) exercises

 We were looking for a solution for conducting DSE/VDU Assessments across all our sites, capturing employees returning to the office and those continuing to work from home. Safety Solution's new digital remote assessment package allowed us to engage effectively with all our employees at a time convenient for them, ensuring their safety and wellness while maintaining legislative compliance. **Aurivo** 

 We were delighted with Safety Solutions for the service they provided to us on conducting home worker assessments for our staff. They are always quick to respond to a request and are very accommodating. The reports are really helpful and are easy for management and the employee to implement. **Tennis Ireland**

training

Safety Solutions have been delivering safety training courses from our first day in business over 25 years ago.

Our training focusses both on the employers' needs and the legislative requirements; in effect, we strike the balance of ensuring the training meets the applicable standards whilst also incorporating our clients' expectations. The Safety Solutions Group is confident that through our safety training, we have played our part in establishing the excellent safety culture many of our clients now take for granted.

With many courses on offer, we cover a broad range of sectors including Construction, Manufacturing, Public Service, Renewable Energy, Education, Pharma and Hospitality. Our trainers and training courses carry external awarding body certification such as SOLAS, City and Guilds, IPAF, RTITB and IOSH.

We provide for both in-person and virtual classroom training environments (Microsoft teams and Zoom). We provide training courses under various categories, such as the following:

- ▶ Construction Plant and Equipment (CSCS)
- ▶ General Plant and Equipment
- ▶ General Safety
- ▶ Traffic Management
- ▶ PHECC First Aid Response
- ▶ Construction and General Safety Management (IOSH)
- ▶ Bespoke/Tailored

In many cases, our clients ask us to modify course contents to meet their specific needs. This could be to incorporate clients' own safety management information, such as risk assessments, in-house procedures or in-house case studies. Safety Solutions welcomes this approach, as in our vast experience this leads to greater buy-in and value for our clients and their employees.

 Safety Solutions provided T Bourke with several courses throughout the year for employees. They have always provided us with the courses we require to maintain compliant with Health and Safety requirements for construction and our own Internal Safety Management System. Safety Solutions have excellent instructors who are enthusiastic, engaging and very well-informed about their subject matter. Our employees gained valuable insight into all the courses they have attended with Safety Solutions. I can't thank Safety Solutions enough for training our employees and would strongly recommend them if you are looking for a training provider for your safety needs. **T. Bourke & Co. Limited Group** 

 The Safety Solutions Group have been providing Health and Safety Training to ESB Networks since 2009. The service provided by Safety Solutions has always been professional and to a high standard and has contributed positively to the safety of our network teams and our overall safety culture within ESB Networks. **ESB Networks**

Quality Assured Certification via our PHECC & IHF Training Institute

WIN

Our Workplace Instructor Network (WIN) is unique. It is an online platform through which instructors can advertise their quality assured courses to employers and learners.

The platform facilitates the verification and certification of courses on behalf of WIN approved instructors. It provides confidence and assurance for all stakeholders, such as employers, learners, and instructors, that all courses are prepared and delivered to the highest possible standards.

- ▶ As an employer, you can have peace of mind that your employees are receiving quality assured training by instructors with whom WIN has verified their qualifications and provided all the necessary training material
- ▶ As a learner, you can be confident that the chosen instructor has been quality assured and has the support and guidance of the Safety Solutions PHECC and IHF Training Institute
- ▶ As an instructor, you are provided with everything you need to deliver quality assured work-based training to your customers with material developed by subject matter experts

For more information on our **WIN services** please contact **Vicky Gray** at vicky@safetysolutions.ie – or – 01 8354084

Delivering Compliance and Peace of Mind for 25 years

Providing Competence, Assurance, Compliance and Training

Plant and Equipment Statutory Certification (Safe Cert)

Safe Cert, the most recent addition to the Safety Solutions Group, specialises in the examination and certification of all types of Plant, Machinery and Lifting Equipment. The need to carry out examinations/inspections and certification of this equipment stems from legislation and is therefore mandatory.

Safe Cert provides a web-based portal access to all our clients through which they can easily access and manage their database of plant and equipment whilst also providing automated reminders of impending re-certification deadlines.

Examples of works completed includes:

- ▶ Examination and Certification of Construction Plant and Equipment, from Telescopic Handlers and Excavators to Safety Harnesses
- ▶ Examination and Certification of Quarry Plant and Equipment including statutory Brake Testing of Loading Shovels and Dumpers
- ▶ Examination and Certification of Industrial Equipment such as Forklifts, MEWP's, Vehicle lifts, racking inspections, Compressors and Cranes of all capabilities
- ▶ Supply and repair of all lifting accessories

At Cleantech Civils we have a large range of plant, machinery and quarry equipment; we use SafeCert for all our examinations and certification. We have always found them to be flexible, professional, and competitive. We would highly recommend SafeCert to any company with similar needs. **Cleantech Civils Ltd., Cavan**

For more information on our **Safe Cert services** please contact **Edel Lynch** at safecert@safetysolutions.ie – or – 086 3474289
