

It is the policy of Safety Solutions Group to provide a safe, efficient, and effective service to our customers while minimising effects on the environment, through our activities, as far as is reasonably practicable.

To achieve this goal, we commit to the following principles:

- We strive to continually improve the performance and effectiveness of our environmental management system (ISO14001:2015),
- We commit to comply with relevant environmental legislation and regulations,
- We ensure that all compliance obligations (including EPA and local authority) are determined and understood,
- We commit to fulfilling each of these and all other applicable compliance obligations to the best of our ability,
- We identify environmental aspects resulting from the work we carrying out and implement control measures where necessary, to ensure minimal negative environmental impact or to create a positive impact if possible.
- We measure our environmental performance through defined monitoring and measurement activities, and we will use this data to identify improvement objectives,
- We are committed to the protection of the environment and the prevention of pollution through:
  - The maintenance of our fleet to ensure emissions compliance and minimise environmental impact,
  - Geographically grouping site visits and assigning them to an employee who lives closest to the area to avoid unnecessary long journeys, reducing emissions and minimising environmental impact,
  - The reduction of paper waste through increased use of technology and software systems,
  - The monitoring of our suppliers' environmental standards.
